

Abigroup Mining Services

Abigroup
Constructing Australia's Future

About Abigroup Mining

Abigroup Mining Services was officially established as a subsidiary of Abigroup Limited in 2007. Before this time however, Abigroup was already active in the mining sector through its regional engineering teams that had undertaken various mining and mining infrastructure projects. So successful were Abigroup's undertakings in this area that in 2006 Abigroup was named **Contract Miner of the Year** by Australian Mining magazine for its success in mineral sands mining in Victoria.

The decision to establish a permanent, dedicated mining business was part of a strategic corporate decision to leverage off the company's significant success in delivering contracting solutions from its core strengths in self performance and plant ownership. With outstanding relationships and partnerships created with our clients Australia wide we wanted to bring this culture to resource and mine owners to provide a real point of difference in the provision of mining contracting services.

Our national businesses, which include Abigroup Mining Services, Abigroup Water, Abigroup Telco & Energy and Abigroup Rail, offer our clients a team of dedicated industry specialists who are able to draw on the broad expertise of the larger Abigroup organisation to ensure every client gets the best, most innovative solution – on time, on budget, with the best outcomes through high levels of collaboration.

Abigroup Limited and its subsidiaries are part of Valemus, which is a wholly owned subsidiary of Bilfinger Berger AG. This strong corporate structure ensures clients are supported not only by the strength of the Abigroup brand and reputation, but by its parent company which is one of the world's top ten multi-service construction companies.

Abigroup Mining – total turnkey solutions

Abigroup Mining Services is an emerging full service national mining contractor that brings with it a formidable pedigree of contracting expertise, service provision, financial strength and experience through its parent, Abigroup Limited, which has been in operation for almost 50 years.

At Abigroup Mining Services we are very proud of our culture, our commitment, our drive and our dedication to solving problems in a collaborative and innovative way for customers and clients. We pride ourselves on this collaborative approach, which drives our responsiveness and dedication to superior service.

We are fully committed to: engaging the best people; providing the most reliable and productive plant and equipment; an innovative approach to operations and problem solving; and, above all else, flexibility to ensure optimal outcomes for our customers and clients in the resources sector.

With access to the extensive in house support of Abigroup and the financial strength of its parent company Valemus, Abigroup Mining Services is comprised of committed professionals who look forward to offering something new, unique and compelling to Australian mining and resources companies.

DOUG GREWAR

**General Manager
Abigroup Mining Services**

The Abigroup difference

As a top-tier contractor Abigroup has the strength, expertise and ability to complete the most demanding of projects. But there is one key strength differentiating Abigroup from its peers ...

**We are a hands-on contractor.
We always have been.**

Behind the hands-on culture is the company's extensive low hour plant and equipment fleet, which is maintained by Abigroup's own maintenance crews to ensure the company's high performance expectations are achieved and that plant and equipment availability is fully maximised.

In 2009 Abigroup invested in new mining equipment and now boasts a modern, low hour fleet.

Abigroup also employs its own teams and boasts a highly skilled workforce. To support the ongoing development of employees, in 2006 Abigroup became a Registered Training Organisation which offers its employees certified training across a range of mining skills. In addition, the company owns multiple mobile heavy equipment simulators using world first technology. These ensure that operators are well trained in the safe confines of the company's training centres before they are deployed to site. Follow-up training is then conducted, with the simulators being transported and strategically located across the country as required.

The benefit of all of this for our clients is that Abigroup retains control over quality, delivery, cost and timing of our projects, ensuring clients are provided the high quality end result they expect – on time, every time.

Our capabilities

With the diverse capability of its parent, Abigroup Mining Services can manage a diverse range of projects for mining industry clients.

As well as our widely acknowledged strength in construction and engineering, Abigroup has earned a reputation for the breadth of delivery methods offered. These include project management, specialist design services, construction management, design & construct, build own operate transfer (BOOT), as well as partnering arrangements including alliances, joint ventures and public private partnerships (PPPs).

Mining

As a mining contractor, we have an engineering, design and construction capability with the capacity to deliver total mine site turnkey solutions to clients.

Our surface mining activities include drill and blast, loading and haulage, crushing and screening, materials handling and train loading.

We manage a full range of mining-specific engineering and civil works including haul road construction, effluent ponds, tailing storage facilities and drainage, and the design and construction of crushing and screening plants.

Civil Engineering

Abigroup has one of the largest and most modern earthmoving fleets in Australia, enabling it to offer a broad range of engineering works including roads, bridges, dams, residential infrastructure, water supply and sewerage, railways, marines and ports and telecommunications.

Abigroup Mining Services offers clients a unique service mix combining Abigroup's hands-on and down to earth approach with the expertise and professionalism of a highly specialised and experienced team.

Abigroup Mining Services provides a complete turnkey service but is also able to tailor its offering to meet specific client requirements whether large or small, simple or complex. Whatever the project, the team values a collaborative working relationship with its clients through all project phases from pre-feasibility to product delivery.
